

## Submission of Manuscript: Harmonic Intelligence and the Geodetic Codex V.3

Dear Editors,

I am pleased to submit the manuscript entitled “Harmonic Intelligence and the Geodetic Codex V3” for consideration in the Journal of Archaeological Science. This study presents a novel integration of geospatial analysis, predictive modeling, and AI-assisted pattern recognition to uncover statistically significant alignments among ancient sites across the globe. Our findings contribute to emerging methodologies in archaeogeodesy and predictive archaeology, offering fresh perspectives on long-standing questions about cultural heritage and planetary dynamics.

I confirm that this manuscript is original, has not been published elsewhere, and is not under consideration by any other publication.

Please find the manuscript attached in PDF format. I appreciate your consideration and look forward to your feedback.

Kind regards,

Glenn Andersen
